

Description for 1000 series Laminate Top with SPACEdge:

- The core material is 45# high density particleboard, 1.125" thick.
- On the upper side, tops have a permanently bonded high-pressure melamine and phenolic laminate.
- On the under side, there is a permanently bonded balance sheet for moisture & warp resistance.
- The SpacEdge is molded polyurethane that has a durometer of 70-80A and is chemically bonded to the particleboard. Is available in either a raised or bullnose style.
- If attached to 601, 602, 603, 601/606, 602/606, 603/606 & 605/606 or 621, 622, 623, 621/606, 622/626 and 623/606 bases included will be imbedded threaded steel inserts to attach to base. It is superior to standard mounting hardware allowing residents to but weight on the table as a means of assisting themselves to get up and also avoiding stripping out of the hardware.
- Using the ASTM E84 standard test. The flame spread of laminate is 170 with a smoke density of 60. According to the National Fire Protection Association this is a class C and according to the Uniform Building code this is a class III.
